Habicht - High Mast

Habicht caters to high mast applications, where the working height reaches up to 60 meters and where strong, lightweight lamps are required to deliver the needed lighting onto the area of effect while maintaining a low weight load on the supporting pole. Habicht can be individually customised to deliver light for varying situations. All of the IPVled products are designed to be lightweight, powerful, durable and highly customisable which are key features that distinguish IPVled from other brands.
